

**GAMING APPARATUS HAVING A CONFIGURABLE CONTROL PANEL**Abstract of the Disclosure

- A gaming method for facilitating game play via a gaming apparatus is provided. The gaming apparatus may include a value input device, a first display unit, and a configurable control panel unit. The configurable control panel unit may include a second display unit and a touch screen unit associated with the second display unit. A value input may be received from a player via the value input device, and the first display unit may be caused to display a first game display relating to one of the following games: poker, blackjack, slots, keno or bingo. One of a plurality of player input displays may be selected, and the second display unit may be caused to display the selected one of the plurality of player input displays. Player input data associated with the selected one of the plurality of player input displays may be received via the touch screen unit, and a value payout associated with an outcome of the game may be determined.
